

Neurodome: Exploring 3D Brain Data in Digital Domes and Virtual Reality

Jonathan A. N. Fisher

Neurosensory Engineering Lab
New York Medical College

Westchester GIS User Group Meeting
May 16th, 2019

Nurturing the next generation of neuroscientists

Real data is key!

Neuroanatomy is difficult to learn from flat images

Ventricular system

Basal ganglia

Hippocampus

Borrowing tools from astronomy education

Immersive display helps make complex data understandable

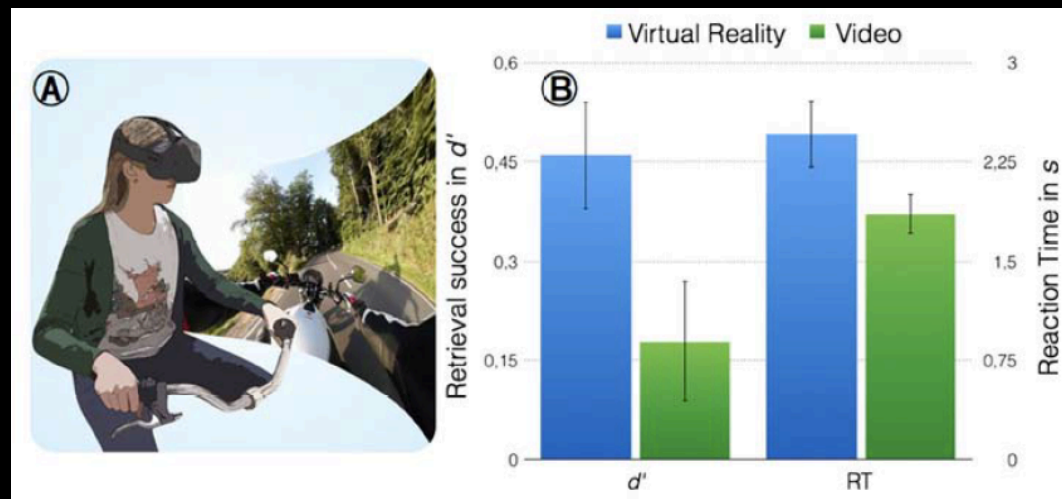

Sloan Digital Sky Survey: Immersive visualization of Digital Universe (AMNH) using Uniview

Immersive displays enhance learning

Tarita-Nistor et al., J. Vestib. Res. 2006

Schöne et al., *Current Psychology* 2017

Map-based spatial learning

The Legend of Zelda, circa 1987

Paxinos & Franklin Stereotaxic Atlas

Route-based spatial learning

Neurodome: Learning through exploring

California Academy of Sciences
Denver Museum of Nature and Science
Beijing Planetarium
Société des Arts Technologiques (Montréal)
Hradec Kralove (Czech Republic)

Inspiria Science Center (Norway)
Bell Museum of Natural History (MN)
World Science Festival (NYU Skirball)
University of Michigan Museum of Natural History
MacMillan Space Center (Vancouver)

Planetario del Parque de las Ciencias (Spain)
Lower Eastside Girls Club
Bronx High School of Science
Otago Museum (NZ)
Cradle of Aviation JetBlue Planetarium

Scales: macro, meso, micro

Lion King scale

NeuroDome Evaluation Questions

Name: [redacted]

School, city, state: [redacted]

Email: [redacted]

Some questions are most applicable to local Twin Cities teachers. We still value your input, so if you are not in the area, please answer the questions as if it were a possibility. The NeuroDome presentation is available state- and nationwide and there could be an opportunity for you to use it at your location.

1. The NeuroDome presentation was a valuable experience for my professional development.
1 2 3 4 5
Strongly Disagree Disagree Neutral Agree Strongly Agree

2. The NeuroDome presentation would be a valuable experience for my students.
1 2 3 4 5
Strongly Disagree Disagree Neutral Agree Strongly Agree

3. Would you be interested in having a NeuroDome presentation either
 - a. at your school in the portable ExploraDome Museum?
yes maybe no
 - b. on field trip to the Bell?
yes maybe no

4. If yes or maybe, would your preference be to have (please circle one)
 - a. a presentation planned and given by Bell education staff
 - b. a presentation tailored to your needs by working with Bell staff in advance
 - c. either way works

5. Would you be interested in giving the presentation yourself (with advance preparation), and Bell staff running the computer?
yes maybe no

6. Do you prefer
 - a. Movie
 - b. Live presentation
 - c. Both

Please turn over to add more comments

8/5/2015

Please share any other comments about the presentation:

I am VERY interested in presenting this to my class! so cool!

Telescope vs. Microscope:

2D vs 3D

To see anything meaningful you need to “throw away” data

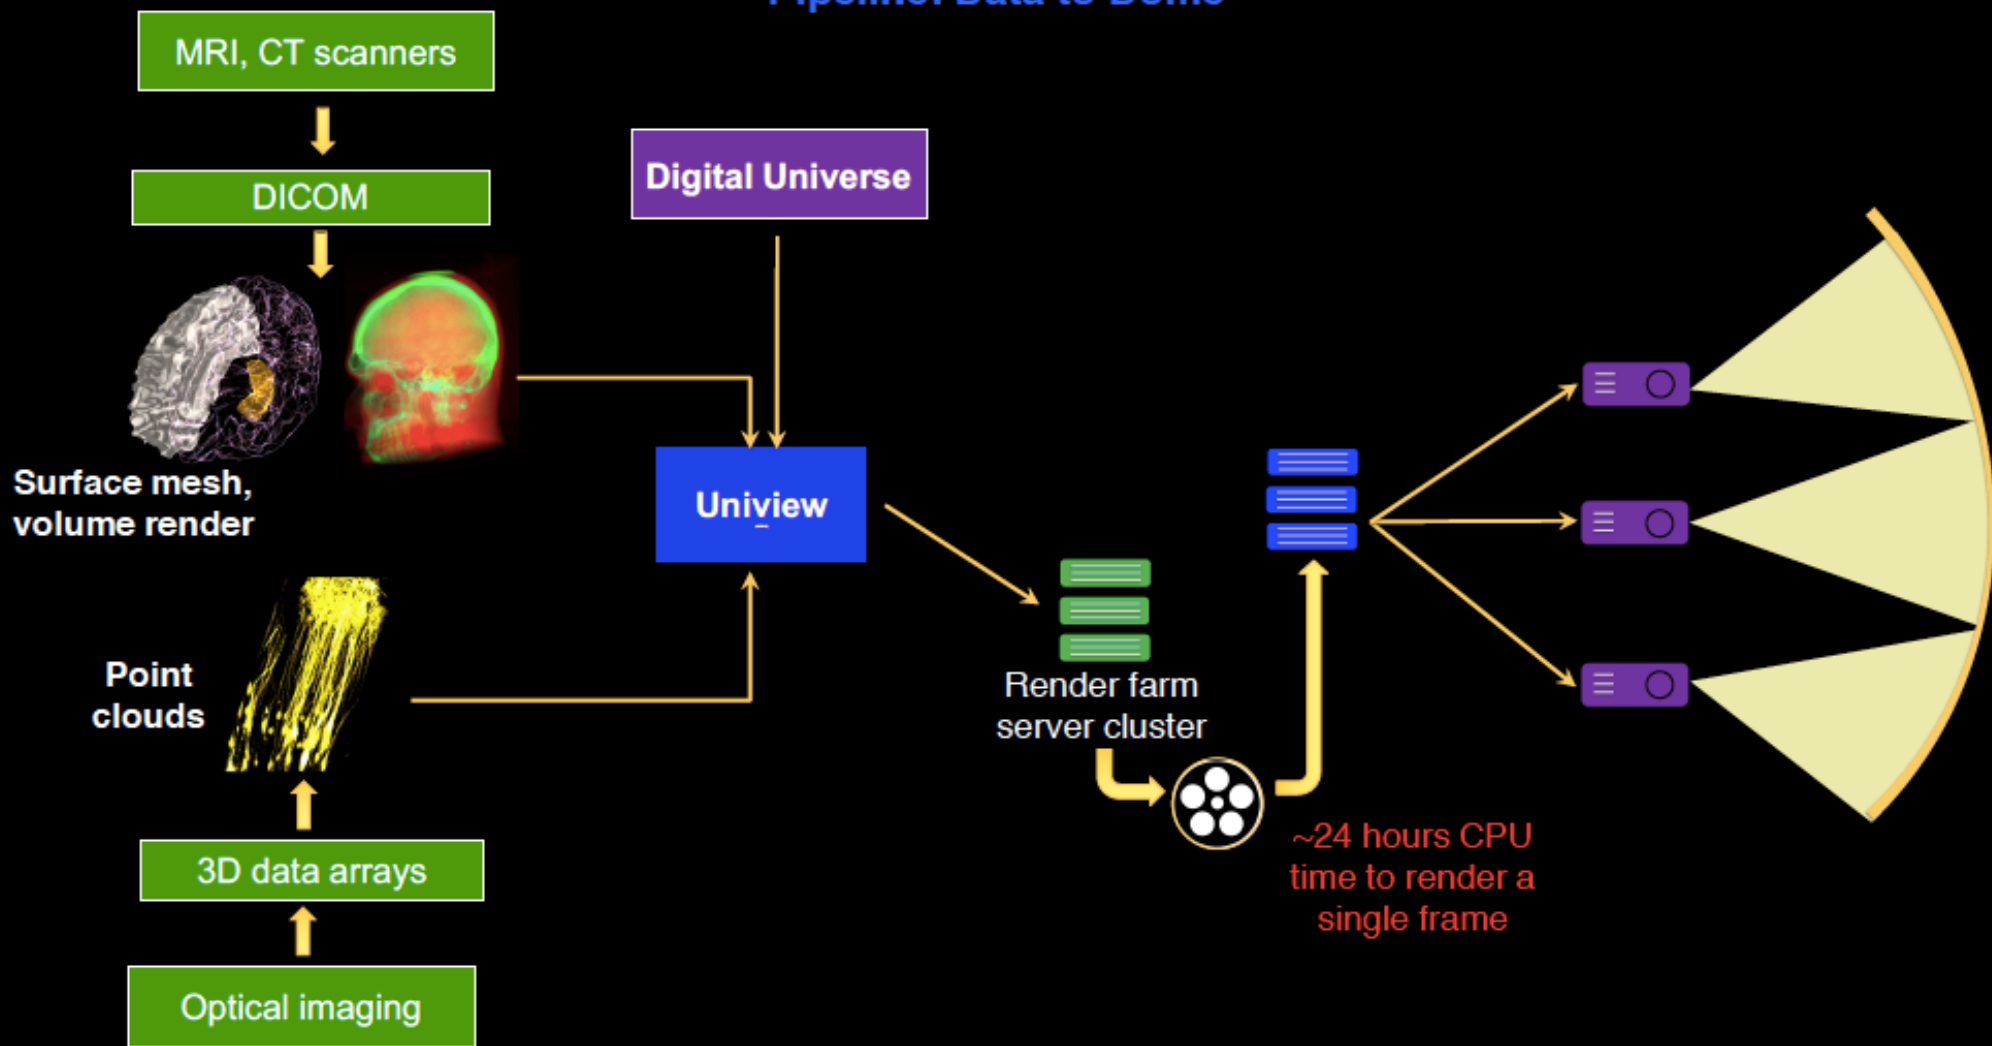

Full CT dataset

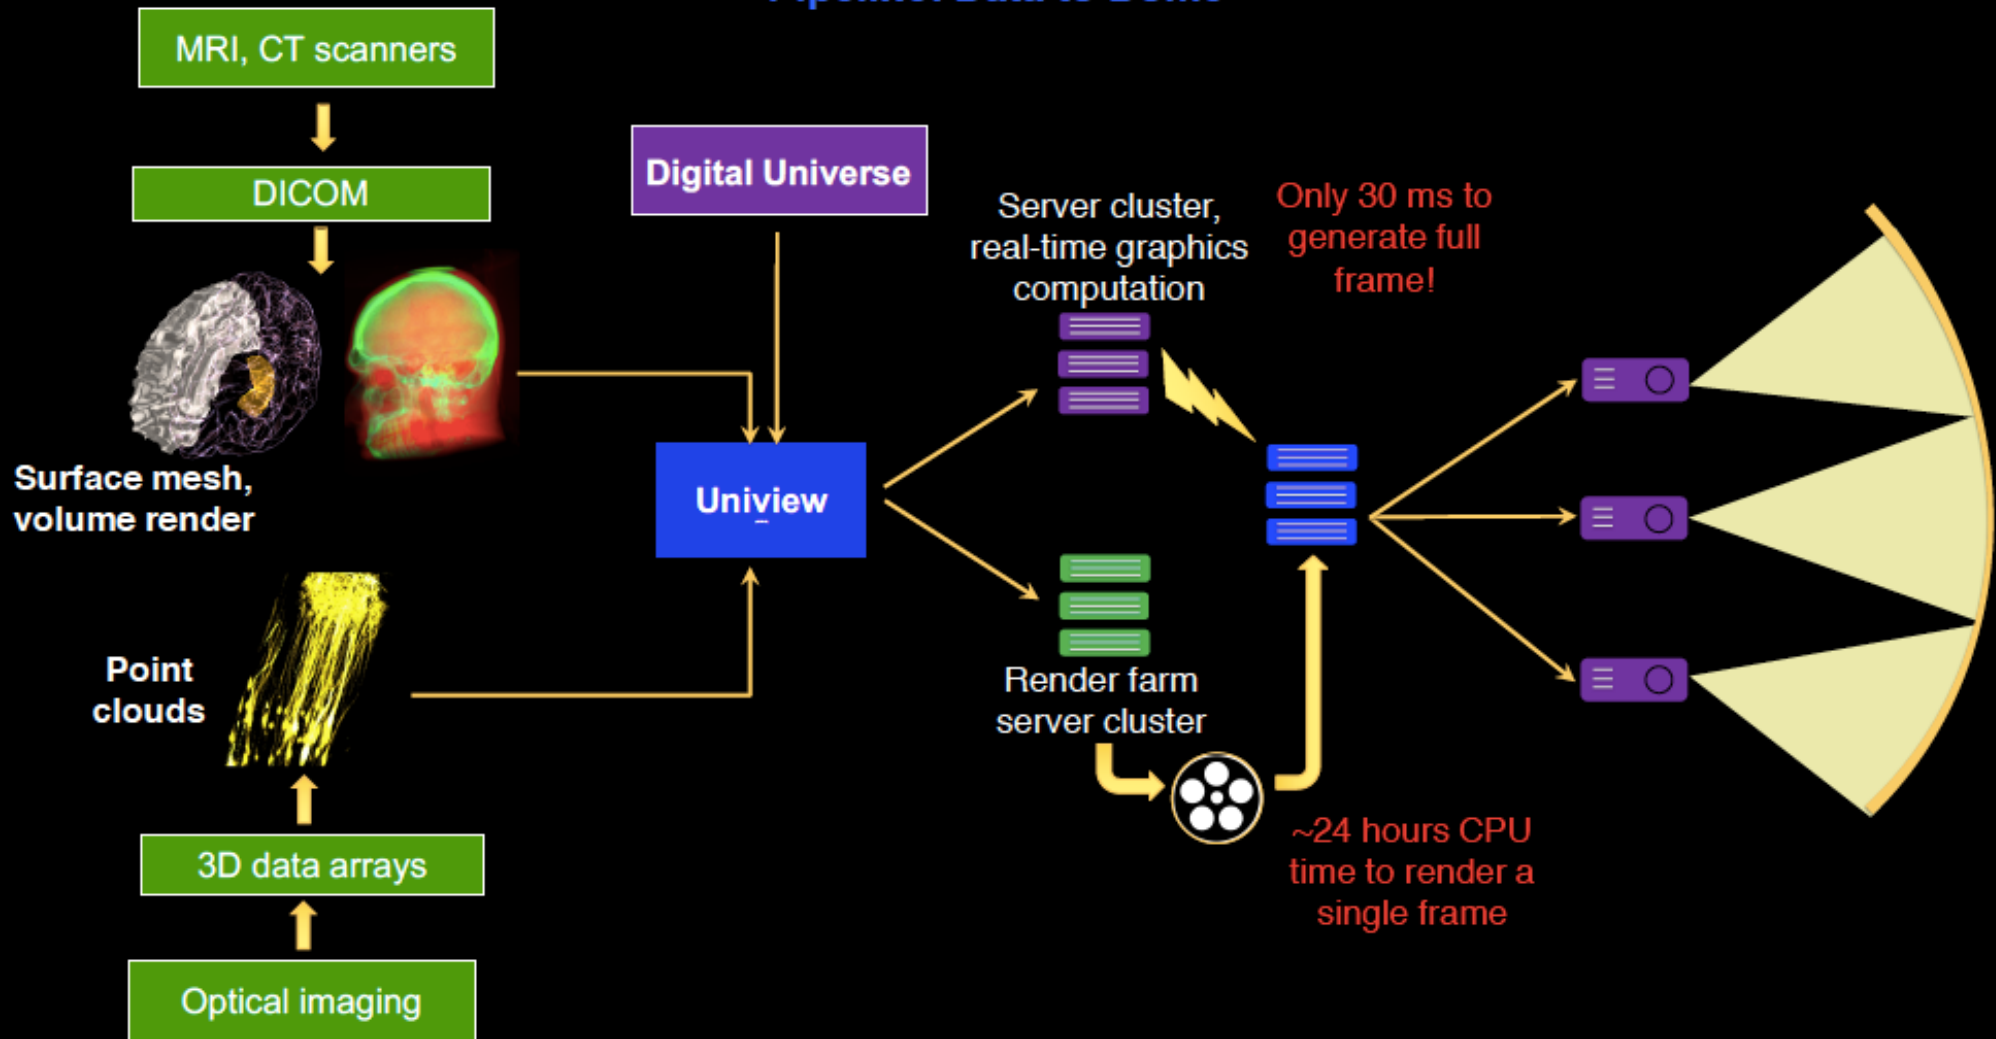

Two intensity windows (bone, skin)

Pipeline: Data to Dome

Pipeline: Data to Dome

Large format: Practical challenges

Alternative immersive format: Head mounted display (HMD)

VR in classroom settings: YouTube360 live stream + Uniview

Neuroanatomy course at NYMC

Survey responses (42 participants):

~60% of students had not personally experienced VR

100% of students wanted VR incorporated into medical neuroanatomy somehow

~20% of participants experienced some transient discomfort during an uninterrupted 45 minutes of viewing

Thanks!
